CAREER OBJECTIVE

Creative and self-motivated individual who turns ideas into working AI-powered websites, chatbots and automation tools. Skilled in the basics of HTML, CSS, JavaScript and Python, with growing expertise in SEO and digital marketing. Seeking an opportunity to put technical and creative skills to work in a growth-oriented role while continuing to learn and contribute to meaningful projects.

SKILLS

- **Digital Marketing:** SEO, Social Media Management, Google Ads, Meta Ads, Prompt Engineering
- **Languages & Web:** HTML, CSS, JavaScript (Basic)
- **Programming:** Python (Basic), IoT (Basic)
- **Tools & Platforms:** Git, GitHub, Replit, VS Code, Google AI Studio, LiveKit
- **Development Approach:** AI-assisted / vibe coding for rapid prototyping
- **Core Strengths:** Problem solving, critical thinking, time management, teamwork, communication

PROJECTS

Tagore Global School — Website

- Designed and deployed a live, fully functional school website with an integrated AI chatbot.
- Handled end-to-end development from layout to deployment, independently.
- Built using AI-assisted development (vibe coding) in VS Code.

Calc Notebook — Online Calculator Website

- Built a free, simple, and clean online calculator platform with 7 calculators: EMI, stamp duty, age, BMI, percentage, CGPA and GST.
- Gave each calculator its own page, so users can open the exact tool they need.
- Developed with AI-assisted coding in VS Code, with the code on GitHub and the site live online.

Calc Notebook Blog Agent — AI Blog Automation

- Built a Python agent that researches calculator topics online (SerpApi) and writes blog posts with an AI model (Groq API).
- Publishes posts automatically to Blogger through the Blogger API, with a different calculator topic each day on a 7-day rotation.
- Adds keyword backlinks to Calc Notebook pages, and runs from GitHub Actions.

RasoiMitra — AI Cooking Assistant

- Built a cooking assistant web app that answers recipe, cooking and nutrition questions using Groq AI.
- Added voice input and spoken replies using the browser Web Speech API.
- Lets users filter recipes by diet, meal type and servings; built with React, Vite and Express and deployed live on Render.

Telegram Automation Bot

- Built a Python Telegram bot with auto-reply and scheduled posting features.
- Posts daily updates with article links to a Telegram group, and keeps recent chat memory in Supabase.
- Deployed live on Render with the code stored on GitHub.

Socratic Math Mentor (AI Chatbot)

- Built an AI chatbot that helps users solve equations, explains mathematical concepts, and provides step-by-step solutions.
- Provides the relevant formulas for each type of math problem to support learning.
- Designed to make math practice easier and more interactive for students.

Tic Tac Toe Game

- Built a browser-based Tic Tac Toe game using HTML, CSS and JavaScript.
- Implemented the game logic to detect wins and draws and restart a new round.

EDUCATION

- **Bachelor of Arts (Pursuing, Final Year)** | Kurukshetra University
- **Digital Marketing with AI (Pursuing)** | NIELIT — since April 2026
- **Senior Secondary (12th)** | HBSE Board — 2024 — 88.2%
